

Solution Overview

Mainland has been providing solutions that protect, optimize and manage complex IT infrastructure for over 20 years. Our certified Exchange experts will help you make the transition to Exchange 2010 quickly and safely including moving all data to the new environment and decommissioning the legacy Exchange servers. Make the leap to Exchange 2010 and take advantage of the new features, including simplified high availability, greater mobility, decreased inbox overload and increased productivity.

Benefits

Some of the benefits you will receive by partnering with Mainland and leveraging our Exchange Server 2010 Transition services are:

- Consultation from Certified Exchange experts
- Peace of mind that your Exchange 2010 transition project will have significantly reduced risk and lower cost
- A messaging infrastructure design that incorporates best practices and years of experience
- Proven project methodology and transition processes

Deliverables

Our Exchange 2010 Transition Offering includes:

- Onsite consultation with a Microsoft Certified Exchange Consultant
- Project management throughout the engagement
- A completely upgraded and functional Exchange 2010 messaging infrastructure as designed
- All legacy Exchange servers decommissioned and removed from the environment
- Enterprise class documentation (which includes):
 - Infrastructure design document and environment diagrams
 - Recommendations and next steps
 - Step by step "as-built" document
 - Test plan document
- Effective knowledge transfer of the new environment to your IT staff

Bundle this offering with any of the following for cost savings:

- Exchange 2010 Readiness Assessment
- Enterprise Vault Upgrade or Implementation
- Lync 2010 Implementation
- Active Directory Upgrade to Windows Server 2008 R2
- Blackberry Enterprise Server Upgrade or Implementation
