

Solution Overview

Symantec Enterprise Vault is an industry leader and has been the only e-mail archiving product in Gartner's Magic Quadrant for more than 8 years. Mainland has the expertise and experience to deploy Enterprise Vault in any sized environment.

Enterprise Vault is ideal for businesses that are concerned with managing the abundant amounts of data stored in an Exchange infrastructure or who need quick discovery for litigation purposes. Using the industry's best archiving product, Mainland will install and configure an email archiving infrastructure for your organization.

Benefits

Some of the benefits you will receive by partnering with Mainland and implementing Enterprise Vault:

- Consultation from a Symantec Certified Technical Specialist with enterprise experience
- Reduce your storage footprint by up to 60%
- Reduce your backup windows and restore times of critical data
- Automated PST ingestion and offline access to archived data (offline access to all of your email)
- Quicker search and faster recovery
- Experience from a trusted team of consultants who have implemented one of the largest Enterprise Vault installations in Canada

Deliverables

Our Enterprise Vault Implementation offering includes:

- Onsite consultation with a Symantec Certified Enterprise Vault Consultant
- Project management throughout the engagement
- A completely implemented and functional Enterprise Vault email archiving infrastructure as designed
- Enterprise class documentation (which includes):
 - Infrastructure design document and environment diagrams
 - Step by step "as-built" document
 - Test plan document
- Effective knowledge transfer of the new environment to your IT staff

Why Mainland

Mainland provides solutions that protect, optimize and manage corporate IT infrastructure. As the rate of change and growth in the corporate digital world accelerates, there comes a point where you need to think and act differently. We do.
