

Solution Overview

The Mainland Exchange Health Check Assessment can be done for Exchange Server 2003, 2007 or 2010 and is ideal for businesses that want answers to the following questions:

- Are there any risks in my current environment that could result in unplanned downtime or additional cost?
- Is our Exchange infrastructure using real world best practices?
- Could we be doing things better with what we have?
- Is my messaging infrastructure running optimally?

Benefits

Some of the benefits you will receive by partnering with Mainland and leveraging our Exchange Server Health Check Assessment are:

- Access to and discussion with a Certified Exchange expert
- Implementing the recommendations from this assessment will lower the risk of unplanned downtime
- Gather a better understanding of you current messaging environment and any risks with the current configuration

Deliverables

Our proactive Exchange Health Check Assessment includes:

1. Onsite consultation with a Microsoft Exchange Certified Consultant
2. Exchange Server Health Check Assessment Report (which includes):
 - List of warnings and errors with high, medium and low risk indicators
 - Mailbox size limit exclusions list (quota exclusions)
 - List of non-default Exchange settings
 - Infrastructure information items:
 - Active Directory forest informational items
 - Active Directory domains informational items
 - Exchange organization informational items
 - Recommendations for remediation of discovered issues
 - includes next steps to resolve and conform to best practices
3. Presentation and discussion of findings
