

Solution Overview

The Vulnerability Assessment identifies systems and platforms of your IT infrastructure susceptible to attack or exploitation.

We know that your company depends on technology to help deliver reliable and secure information systems for IT operations. Maintaining optimal levels of security, functionality, and performance is challenging and places strains on your IT professional resources. IT risk should be treated like other key business risks such as market, credit, and operational risk. A vulnerability assessment is the guidance and first steps Mainland Security can assist with your IT security program.

Whether you are a CIO, IT Manager, or IT administrator you will receive support and guidance to help you increase security in your IT environment. Vulnerability Assessment is a proactive security engagement.

Benefits

The Vulnerability Assessment is quickly deployed service without interruption designed to provide you with immediate results:

- Understand, prioritize, and report systems and applications that are most vulnerable to attack, data loss, or unavailability
- Discover systems and applications that are not compliant with audit, laws, or regulations
- Developing a security baseline and classification standards
- Understand and mature your risk management program and security measures required to protect systems and applications
- Leverage third party professional independence to assist with assessment and re-evaluation throughout your risk management program

Deliverables

- Installation of a security appliance designed to quickly assess without disruption
- Evaluate systems to determine security status
- Scope of the engagement can vary on the depth and number of hosts and sites defined by the client. Security resource requires 1 to 3 days to evaluate selected systems and applications
- Vulnerability Assessment report to present findings and recommendations to reduce risk to business and IT operations

Why Mainland

Mainland provides solutions that protect, optimize and manage corporate IT infrastructure. As the rate of change and growth in the corporate digital world accelerates, there comes a point where you need to think and act differently. We do.
