

Solution Overview

Mainland's Virtualization Assessment is designed for companies who need to quantify their return on investment and identify their candidacy for server virtualization. The Virtualization Assessment will also determine current server utilization and peak usage within your organization. Our VMware certified professionals will consolidate and model the data collected in order to analyze the maximum financial benefit possible. The Virtualization Assessment will tell you how many vSphere host you need and which applications and workloads are good virtualization candidates. Optionally, this can include financial return estimates to be included into your presentation.

Benefits

Some of the benefits you will receive by partnering with Mainland and leveraging our Virtualization Assessment are:

- Ensure your vSphere hosts are sized to industry best practice and expected growth
- Ensure that your applications and workloads are sized properly for virtualization
- Support from our team to quantify your return on investment
- Access to and discussion with a virtualization expert

Deliverables

Documentation outlining the following:

- Inventory and Performance data
- Technical Analysis of measured workload
- Preliminary Architecture
- Presentation of findings
- Proposal (Next Steps)

Why Mainland

Mainland provides solutions that protect, optimize and manage corporate IT infrastructure. As the rate of change and growth in the corporate digital world accelerates, there comes a point where you need to think and act differently. We do.

Mainland, a VMware Enterprise partner has established itself in the minds of Customers, Business Partners, and VMware as the premier "go-to" organization regarding VMware products, services and solutions in Western Canada. Our highly trained VCP certified virtualization experts all have operational backgrounds in virtualization which proves to be a valuable consulting asset on every engagement.
