

Solution Overview

Our Site Recovery Manager Jumpstart deploys a production ready VMware SRM implementation. The engagement includes installation, configuration and testing of all components including knowledge transfer of best practices. Mainland will demonstrate a single-site failover and demonstrate the storage vendor's recommended method of failing a workload back to the primary site using non-production workloads.

Benefits

Some of the benefits you will receive by partnering with Mainland and leveraging our vSphere Jumpstart are:

- Ensure Site Recovery Manager is built as per VMware best practices
- Comprehensive and complete knowledge transfer
- Fully tested and production ready Disaster Recovery for your Virtual Infrastructure
- Access to and discussion with VMware certified experts

Deliverables

- Provide project management throughout the entire engagement
- Provide guidance on site preparation for the engagement (Site Recovery Manager Jumpstart Checklist)
- Install and configure Site Recovery Adapter and Site Recovery Manager components
- Configure and demonstrate single site fail-over of a single "non-production" workload
- Demonstrate a "fail-back" in accordance with storage manufacturer's best practice recommendations
- Provide complete knowledge transfer on operation and administration of Site Recovery Manager environment
- Comprehensive documentation package
